ABOUT HAVOC MOTORCYCLES

Havoc Motorcycles is a DOT-registered motorcycle manufacturer that makes heavyweight cruisers and parts and accessories for Harley-Davidsons. Havoc is a distributor for Aquatic AV electronics.

ABOUT AQUATIC AV

Aquatic AV designs premium audio solutions for marine, powersports, spas, ATVs, golf carts, and Harley-Davidson motorcycles. Their products combine durability, style, and cutting-edge technology to enhance every adventure. The electronics platform behind every Havoc Roar Stereo system.

FEEL THE ROAR, HEAR THE HAVOC

The Havoc Roar Stereo line was purpose-engineered for un-faired Harley-Davidson motorcycles with OEM-quality fit and finish, engineered aluminum housings, and plug-and-play wiring harnesses. Every system is backed by a 2-year manufacturer's warranty.

Recognized by American Motorcycle Dealer as one of the most noteworthy products in the 2026 V-Twin market.

A WORD FROM THE MANUFACTURER

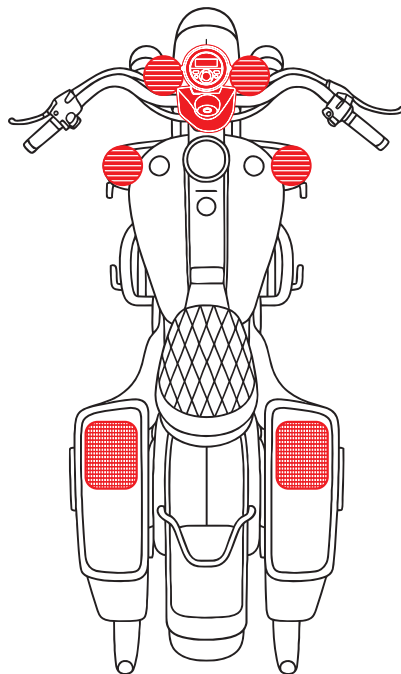

“We kept hearing the same thing from riders on un-faired bikes — they felt nobody was building a system that truly belonged on their motorcycle, with the sound quality to match their buddies on faired touring models.

So we spent three years getting it right. The result is a system engineered specifically for Road Kings and Softails — weatherproof, vibration-proof, loud enough to hear at highway speeds, and styled to look like it came from the factory.

We're fellow bikers. We heard you. We hope you love it as much as we do.”

— Jarrod, Founder, Havoc Motorcycles Inc.

THE HRS ECOSYSTEM

Three speaker locations. Endless possibilities.

Handlebar, highway bar, and saddlebag speaker positions give Road King riders 16 uniquely configured systems — choose RGB illuminated speakers or premium Neo speakers. Softail riders choose from 7 configurations, with dedicated systems for Dyna, Sportster, and Custom models.

Your bike. Your sound. Your way.

Every HRS kit ships complete — head unit, amplifier, speakers, engineered aluminum housings, and plug-and-play harness. Nothing to source separately. Everything fits first time.

WHY HRS

Integrated systems with AM/FM radio, Bluetooth, USB input, and Sirius/XM (with the Sirius/XM app)

Head unit display you can actually see — line of sight, dimmable display showing radio station, track playing, and clock

A full range of options — Sport 2-speaker systems (144W–480W), Immersive 4-speaker systems (444W–960W), and Surround Sound 6-speaker systems (744W–1,100W).

Everything included for un-faired HD motorcycles — Road King, Softail, Dyna & Sportster - head unit, speakers, amplifier, machined housings, mounting hardware, plug-and-play wiring harness. Designed and sold as integrated systems, specific to your motorcycle.

Available in black or chrome — engineered aluminum housings with OEM-like fitment, not generic component mounts

Fits a wide range of Harley-Davidson models — Road King (1994–2025), Softail (1984–present), Dyna and Sportster (1984–present)

Dealer installed or DIY — plug-and-play wiring harnesses, clean installs, minimal lift time

Marine-grade Aquatic AV electronics — weatherproof, built for the road

2-year manufacturer's warranty — buy with confidence
